

SAVOIR BEDS

SINCE 1905

Fitting legs and castors
to the divan base

FITTING LEGS TO THE DIVAN BASE

STEP 1

Locate the leg thread on the underside of the divan base at each external corner. It will be marked with a white label.

STEP 2

With each wooden leg, locate the thread into the hole.

STEP 3

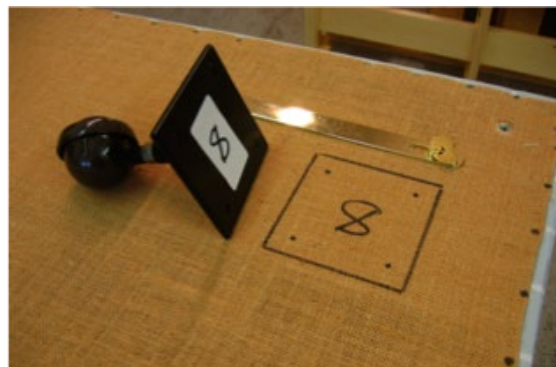

Holding the leg straight, rotate the leg all the way until it tightens on the thread. Do not over tighten the leg, as this may damage the leg and the thread.

FITTING CASTORS TO THE DIVAN BASE

STEP 1

Unpack all the castors from the box. Each castor has a number that matches the number on the divan base.

STEP 2

Carefully locate the castors onto the marked area.

STEP 3

Using the screws & screwdriver supplied securely fix the castor mount to the divan base. Once the castors have been fitted, place a plastic castor cup under each castor. These castor cups are designed to stop movement of the bed and also to reduce damage to flooring and carpets.
